IHC analysis of FOXP3 antibody (clone FHBP3-1) and human tonsil tissue. Required HIER: boil tissue sections in 10mM Tris buffer with 1mM EDTA, pH 9, for 10-20 min.

## Description

The FOX family of transcription factors is a large group of proteins that share a common DNA binding domain termed a winged-helix or forkhead domain. FOXP3 is essential for normal immune homeostasis. It represses transcription through a DNA binding forkhead domain, thereby regulating T cell activation.

## Application Notes

Titering of the FOXP3 antibody may be required for optimal performance.

1. The prediluted format is supplied in a dropper bottle and is optimized for use in IHC. After epitope retrieval step (if required), drip mAb solution onto the tissue section and incubate at RT for 30 min.

## Immunogen

An N-terminal recombinant protein fragment was used as the immunogen for this FOXP3 antibody.

## Storage

Store the FOXP3 antibody at 2-8oC (with azide) or aliquot and store at -20oC or colder (without azide).

## Alternate Names
