## Description

Fyn Antibody detects Tyrosine-protein kinase Fyn, a member of the protein-tyrosine kinase oncogene family. It is a membrane-associated tyrosine kinase that has been implicated in the control of cell growth. Fyn associates with the p85 subunit of phosphatidylinositol 3-kinase and interacts with the fyn-binding protein. Alternatively spliced transcript variants encoding distinct isoforms exist.

This antibody is part of a [broader antibody panel](#) offered by NSJ Bioreagents.

## Application Notes

Optimal dilution of the Fyn antibody should be determined by the researcher.

## Immunogen

A synthetic peptide specific to human Fyn was used as the immunogen for the Fyn antibody.

## Storage

Store the Fyn antibody at -20oC.

## Alternate Names
