Description

Glutamate/aspartate transporter 1 (GLAST1) transports L-glutamate and also L- and D-aspartate. Essential for terminating the postsynaptic action of glutamate by rapidly removing released glutamate from the synaptic cleft. Acts as a symport by cotransporting sodium. [UniProt]

Application Notes

The stated application concentrations are suggested starting points. Titration of the GLAST antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 127-161 from human GLAST was used as the immunogen for the GLAST antibody.

Storage

Aliquot the GLAST antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
