Description

Binds fibroblast growth factor and E-selectin (cell-adhesion lectin on endothelial cells mediating the binding of neutrophils). [UniProt]

Application Notes

The stated application concentrations are suggested starting points. Titration of the GLG1 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 1152-1179 from the human protein was used as the immunogen for the GLG1 antibody.

Storage

Aliquot the GLG1 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
