

# **GRB10 Antibody (RQ5731)**

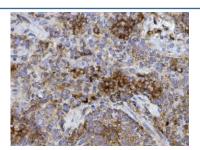

| Catalog No. | Formulation   | Size   |
|-------------|---|--------|
| RQ5731      | 0.5mg/ml if reconstituted with 0.2ml sterile DI water | 100 ug |

## **Bulk quote request**

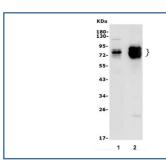

| Availability       | 1-3 business days  |
|--------------------|--|
| Species Reactivity | Mouse, Rat   |
| Format             | Antigen affinity purified  |
| Clonality          | Polyclonal (rabbit origin)   |
| Isotype            | Rabbit IgG   |
| Purity             | Affinity purified  |
| Buffer             | Lyophilized from 1X PBS with 2% Trehalose and 0.025% sodium azide  |
| UniProt            | Q60760   |
| Applications       | Western Blot : 0.5-1ug/ml Immunohistochemistry : 1-2ug/ml Flow Cytometry : 1-3ug/million cells Direct ELISA : 0.1-0.5ug/ml |
| Limitations        | This GRB10 antibody is available for research use only.  |

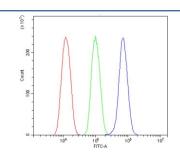

IHC staining of FFPE mouse spleen with GRB10 antibody. HIER: boil tissue sections in pH8 EDTA for 20 min and allow to cool before testing.

IHC staining of FFPE rat spleen with GRB10 antibody. HIER: boil tissue sections in pH8 EDTA for 20 min and allow to cool before testing.

Western blot testing of 1) mouse brain and 2) rat NRK lysate with GRB10 antibody. Expected molecular weight: 58-70 kDa.

Flow cytometry testing of mouse HEPA1-6 cells with GRB10 antibody at 1ug/million cells (blocked with goat sera); Red=cells alone, Green=isotype control, Blue= GRB10 antibody.

## **Description**

GRB10, Growth factor receptor-bound protein 10, also known as insulin receptor-binding protein Grb-IR is a protein that in humans is encoded by the GRB10 gene. The product of this gene belongs to a small family of adapter proteins that are known to interact with a number of receptor tyrosine kinases and signaling molecules. This gene encodes a growth factor receptor-binding protein that interacts with insulin receptors and insulin-like growth-factor receptors(e.g., IGF1R and IGF2R). Overexpression of some isoforms of the encoded protein inhibits tyrosine kinase activity and results in growth suppression. This gene is imprinted in a highly isoform- and tissue-specific manner. Alternatively spliced transcript variants encoding different isoforms have been identified.

### **Application Notes**

Optimal dilution of the GRB10 antibody should be determined by the researcher.

#### **Immunogen**

Recombinant mouse protein (amino acids M1-K276) was used as the immunogen for the GRB10 antibody.

#### **Storage**

After reconstitution, the GRB10 antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
