

## Hepatitis B Virus Antibody / HBV (Large S Protein) (R32633)

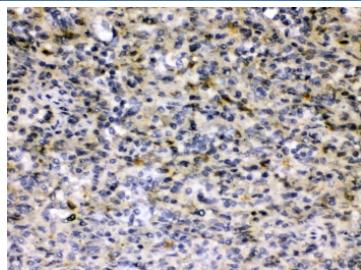

Catalog No.	Formulation	Size
R32633	0.5mg/ml if reconstituted with 0.2ml sterile DI water	100 ug

**Bulk quote request**

<b>Availability</b>	1-3 business days
<b>Species Reactivity</b>	Hepatitis B Virus (Human)
<b>Format</b>	Antigen affinity purified
<b>Host</b>	Rabbit
<b>Clonality</b>	Polyclonal (rabbit origin)
<b>Isotype</b>	Rabbit IgG
<b>Purity</b>	Antigen affinity
<b>Buffer</b>	Lyophilized from 1X PBS with 2.5% BSA, 0.025% sodium azide
<b>UniProt</b>	D2X4M3
<b>Applications</b>	Western Blot : 0.5-1ug/ml Immunohistochemistry (FFPE) : 1-2ug/ml
<b>Limitations</b>	This Hepatitis B Virus antibody is available for research use only.

IHC testing of FFPE human liver cancer tissue with Hepatitis B Virus antibody at 0.5ug/ml. HIER: steam section in pH6 citrate buffer for 20 min and allow to cool prior to testing.

IHC testing of FFPE human Hepatitis B+ tissue with Hepatitis B Virus antibody at 0.5ug/ml. HIER: steam section in pH6 citrate buffer for 20 min and allow to cool prior to testing.

## Description

Hepatitis B virus, abbreviated HBV, is a species of the genus Orthohepadnavirus, which is likewise a part of the Hepadnaviridae family of viruses. This virus causes the disease hepatitis B. It consists of HBsAg, HBcAg (HBeAg is a splice variant), Hepatitis B virus DNA polymerase and HBx. Among these, HBsAg (also known as the Australia antigen) is the surface antigen of the hepatitis B virus (HBV). It indicates current hepatitis B infection. The viral envelope of an enveloped virus has different surface proteins from the rest of the virus which act as antigens. These antigens are recognized by antibody proteins that bind specifically to one of these surface proteins.

## Application Notes

Optimal dilution of the Hepatitis B Virus antibody should be determined by the researcher.

## Immunogen

Amino acids 4-51 (WSSKPRQGMGTNLSPNPLGFFPDHQLDPAFGANSNNPDWDFNPNKDQ) from the human HBV Large S protein were used as the immunogen for the Hepatitis B Virus antibody.

## Storage

After reconstitution, the Hepatitis B Virus antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
