

HIF1A Antibody [clone 288CT11.7.1] (F53560)

Catalog No.	Formulation	Size
F53560-0.1ML	In ascites with 0.09% sodium azide	0.1 ml

Bulk quote request

Availability	1-3 business days
Species Reactivity	Human
Format	Ascites
Host	Mouse
Clonality	Monoclonal (mouse origin)
Isotype	Mouse IgM, k
Clone Name	288CT11.7.1
Purity	Ascites
UniProt	Q16665
Localization	Nuclear, possible cytoplasmic
Applications	Western Blot : 1:100-1:1000
Limitations	This HIF1A antibody is available for research use only.

HIF1A antibody western blot analysis in U251 lysate. Routinely observed molecular weight: 100~120 kDa.

Description

Hypoxia-inducible factor-1 (HIF1) is a transcription factor found in mammalian cells cultured under reduced oxygen tension that plays an essential role in cellular and systemic homeostatic responses to hypoxia. HIF1 is a heterodimer composed of an alpha subunit and a beta subunit. The beta subunit has been identified as the aryl hydrocarbon receptor nuclear translocator (ARNT). This gene encodes the alpha subunit of HIF-1. Overexpression of a natural antisense transcript (ahIF) of this gene has been shown to be associated with nonpapillary renal carcinomas. Two alternative

transcripts encoding different isoforms have been identified.

Application Notes

Titration of the HIF1A antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

This HIF1A antibody was produced from mouse immunized with HIF1A recombinant protein.

Storage

Aliquot the HIF1A antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
