## Description

HLA-G is a non-classical major histocompatibility class Ib molecule involved in immune regulatory processes at the maternal-fetal interface. [UniProt]

## Application Notes

Optimal dilution of the HLA-G antibody should be determined by the researcher.

## Immunogen

A recombinant partial protein sequence (within amino acids 1-200) from the human protein was used as the immunogen for the HLA-G antibody.

## Storage

Aliquot the HLA-G antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
