Description

'3-hydroxy-3-methylglutaryl-coenzyme A reductase' is a transmembrane glycoprotein that is the rate-limiting enzyme in cholesterol biosynthesis as well as in the biosynthesis of nonsterol isoprenoids that are essential for normal cell function including ubiquinone and geranylgeranyl proteins.

Application Notes

Optimal dilution of the HMGCR antibody should be determined by the researcher.

Immunogen

A synthetic peptide specific to human Hmg Coa Reductase / HMGCR was used as the immunogen for the HMGCR antibody.

Storage

Store the HMGCR antibody at -20oC.
