HOXA9 antibody flow cytometric analysis of A375 cells (green) compared to a [negative control](#) (blue). FITC-conjugated goat-anti-rabbit secondary Ab was used for the analysis.

## Description

HOXA9 is the class of transcription factors called homeobox genes are found in clusters named A, B, C, and D on four separate chromosomes. Expression of these proteins is spatially and temporally regulated during embryonic development.

## Application Notes

Titration of the HOXA9 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

A portion of amino acids 245-272 from the human protein was used as the immunogen for this HOXA9 antibody.

## Storage

Aliquot the HOXA9 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
