## Description

The 70 kilodalton heat shock proteins (Hsp70s or DnaK) are a family of conserved ubiquitously expressed heat shock proteins. Proteins with similar structure exist in virtually all living organisms. The Hsp70s are an important part of the cell's machinery for protein folding, and help to protect cells from stress. [Wiki]

## Application Notes

Optimal dilution of the HSP70 antibody should be determined by the researcher.

## Immunogen

A synthetic peptide specific to human HSPA1A/B was used as the immunogen for the HSP70 antibody.

## Storage

Store the HSP70 antibody at -20oC.
