

HSPA8 Antibody / HSC70 [clone DBB-8] (RQ5351)

Catalog No.	Formulation	Size
RQ5351	Antibody in PBS with 0.02% sodium azide, 50% glycerol and 0.4-0.5mg/ml BSA	100 ul

Bulk quote request

Availability	1-2 weeks
Species Reactivity	Human, Mouse, Rat
Format	Purified
Clonality	Rabbit Monoclonal
Isotype	Rabbit IgG
Clone Name	DBB-8
Purity	Affinity purified
UniProt	P11142
Applications	Western Blot : 1:500-1:2000
Limitations	This HSPA8 antibody is available for research use only.

Western blot testing of 1) human HeLa and 2) rat C6 cell lysate with HSPA8 antibody. Predicted molecular weight \sim 71 kDa, routinely observed at 70-73 kDa.

Description

The HSPA8 gene encodes a member of the heat shock protein 70 family, which contains both heat-inducible and constitutively expressed members. This protein belongs to the latter group, which are also referred to as heat-shock cognate proteins. It functions as a chaperone, and binds to nascent polypeptides to facilitate correct folding. It also functions as an ATPase in the disassembly of clathrin-coated vesicles during transport of membrane components through the cell. Alternatively spliced transcript variants encoding different isoforms have been found for this gene. [RefSeq]

Application Notes

Optimal dilution of the HSPA8 antibody should be determined by the researcher.

Immunogen

A synthetic peptide specific to human HSC70 / HSPA8 was used as the immunogen for the HSPA8 antibody.

Storage

Store the HSPA8 antibody at -20oC.
