

ICOS Ligand Antibody / ICOS-L / B7RP-1 [clone ICOSL/3260] (V7774)

| Catalog No. | Formulation | Size |
|----------------|--|--------|
| V7774-100UG | 0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide | 100 ug |
| V7774-20UG | 0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide | 20 ug |
| V7774SAF-100UG | 1 mg/ml in 1X PBS; BSA free, sodium azide free | 100 ug |

Bulk quote request

| | |
|---------------------------|---|
| Availability | 1-3 business days |
| Species Reactivity | Human |
| Format | Purified |
| Host | Mouse |
| Clonality | Monoclonal (mouse origin) |
| Isotype | Mouse IgG2b, kappa |
| Clone Name | ICOSL/3260 |
| Purity | Protein G affinity chromatography |
| UniProt | O75144 |
| Applications | ELISA (order BSA-free Format For Coating) : Immunohistochemistry (FFPE) : 1-2ug/ml |
| Limitations | This ICOS Ligand antibody is available for research use only. |

IHC staining of FFPE human colon carcinoma with ICOS Ligand antibody (clone ICOSL/3260). HIER: boil tissue sections in pH 9 10mM Tris with 1mM EDTA for 10-20 min and allow to cool before testing.

Human Protein Microarray Specificity Validation

Analysis of HuProt(TM) microarray containing more than 19,000 full-length human proteins using ICOS Ligand antibody (clone ICOSL/3260). These results demonstrate the foremost specificity of the ICOSL/3260 mAb.

Z- and S- score: The Z-score represents the strength of a signal that an antibody (in combination with a fluorescently-tagged anti-IgG secondary Ab) produces when binding to a particular protein on the HuProt(TM) array. Z-scores are described in units of standard deviations (SD's) above the mean value of all signals generated on that array. If the targets on the HuProt(TM) are arranged in descending order of the Z-score, the S-score is the difference (also in units of SD's) between the Z-scores. The S-score therefore represents the relative target specificity of an Ab to its intended target.

SDS-PAGE analysis of purified, BSA-free ICOS Ligand antibody (clone ICOSL/3260) as confirmation of integrity and purity.

Description

This MAbs recognizes a protein of 36kDa, identified as ICOS-L. It is a ligand for the ICOS receptor that initiates T and B cell proliferation and cytokine secretion. ICOS-L interactions play an essential role in T cell-dependent B cell activation in peripheral lymphoid organs such as spleen and lymph nodes. ICOS-L protein is present in myeloid leukocytes, and by Northern blot there are 2.4, 3.0, and 7.0 kb transcripts in brain, heart, kidney, and liver, with lower expression in colon and thymus, and a 1.1 kb transcript in leukocytes. Tumor necrosis factor alpha (TNF), granulocyte-macrophage colony-stimulating factor (GM-CSF) and interleukin-4 (IL-4) enhance its expression. LPS-induced up-regulation of ICOS-L is dependent on the MyD88-dependent signaling pathway.

Application Notes

Optimal dilution of the ICOS Ligand antibody should be determined by the researcher.

Immunogen

A recombinant human partial protein (amino acids 23-149) was used as the immunogen for the ICOS Ligand antibody.

Storage

Store the ICOS Ligand antibody at 2-8°C (with azide) or aliquot and store at -20°C or colder (without azide).
