Description

Along with the enzymes encoded by the INDO and TDO2 genes, the enzyme encoded by the INDOL1 gene metabolizes tryptophan in the kynurenine pathway.

Application Notes

The stated application concentrations are suggested starting points. Titration of the IDO2 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 267-295 from the human protein was used as the immunogen for the IDO2 antibody.

Storage

Aliquot the IDO2 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
