| Limitations | This IKKb antibody is available for research use only. |

Description

The protein encoded by the IKBKB gene phosphorylates the inhibitor in the inhibitor/NF-kappa-B complex, causing dissociation of the inhibitor and activation of NF-kappa-B. The encoded protein itself is found in a complex of proteins. [RefSeq]

Application Notes

Optimal dilution of the IKKb antibody should be determined by the researcher.

Immunogen

A synthetic peptide specific to human IKK beta / IKBKB was used as the immunogen for the IKKb antibody.

Storage

Store the IKKb antibody at -20oC.
