Description

Fibroblast growth factors are secreted proteins involved in cellular proliferation, migration, differentiation, and survival. FGF activity is negatively regulated by members of the 'sprouty' family. SEF/IL17RD is a modulator of FGF signaling.

Application Notes

Titration of the IL17RD antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 217-245 from the human protein was used as the immunogen for this IL17RD antibody.

Storage

Aliquot the IL17RD antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
