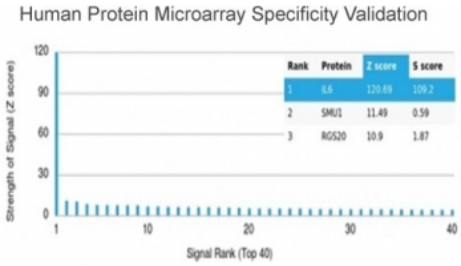
Interleukin-6 Antibody [clone IL6/4647] (V4027)

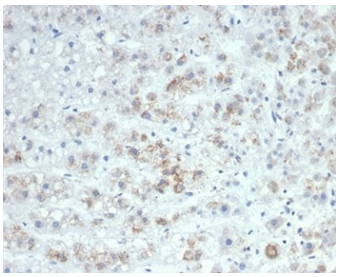
Catalog No.	Formulation	Size
V4027-100UG	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced), 0.05% sodium azide	100 ug
V4027-20UG	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced), 0.05% sodium azide	20 ug
V4027SAF-100UG	1 mg/ml in 1X PBS; BSA free, sodium azide free	100 ug

Bulk quote request

Availability	1-3 business days
Species Reactivity	Human
Format	Purified
Host	Mouse
Clonality	Monoclonal (mouse origin)
Isotype	Mouse IgG1, kappa
Clone Name	IL6/4647
Purity	Protein A/G affinity
UniProt	P05231
Localization	Cytoplasm, extracellular
Applications	Immunohistochemistry (FFPE) : 1-2ug/ml
Limitations	This Interleukin-6 antibody is available for research use only.



Analysis of HuProt(TM) microarray containing more than 19,000 full-length human proteins using Interleukin-6 antibody (clone IL6/4647). These results demonstrate the foremost specificity of the IL6/4647 mAb. Z- and S- score: The Z-score represents the strength of a signal that an antibody (in combination with a fluorescently-tagged anti-IgG secondary Ab) produces when binding to a particular protein on the HuProt(TM) array. Z-scores are described in units of standard deviations (SD's) above the mean value of all signals generated on that array. If the targets on the HuProt(TM) are arranged in descending order of the Z-score, the S-score is the difference (also in units of SD's) between the Z-scores. The S-score therefore represents the relative target specificity of an Ab to its intended target.



IHC staining of FFPE human adrenal gland tissue with IL-6 antibody (clone IL6/4647) at 2ug/ml. HIER: boil tissue sections in pH 9 10mM Tris with 1mM EDTA for 20 min and allow to cool before testing.

Description

IL-6 is a potent lymphoid cell growth factor that stimulates the growth and survivability of certain B-cells and T-cells. It plays a critical role in B-cell differentiation to plasma cells and is a potent growth factor for plasmacytoma and myeloma. IL-6 is produced by a variety of cell types, including monocytes, fibroblasts and endothelial cells. Upon stimulation, macrophages, T, B, mast, and glial cells, eosinophils, keratinocytes and granulocytes also secrete IL-6.It is involved in host defense, acute phase reactions, immune responses, and hematopoiesis.

Application Notes

Optimal dilution of the Interleukin-6 antibody should be determined by the researcher.

Immunogen

A portion of amino acids 1-200 from the human IL-6 protein was used as the immunogen for the Interleukin-6 antibody.

Storage

Aliquot the Interleukin-6 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
