Description

Potassium voltage-gated channel, Shal-related subfamily, member 1 (KCND1), also known as Kv4.1, is member of the potassium channel, voltage-gated, shal-related subfamily, members of which form voltage-activated A-type potassium ion channels and are prominent in the repolarization phase of the action potential.

Application Notes

Optimal dilution of the KCND1 antibody should be determined by the researcher.

Immunogen

Recombinant human protein (amino acids E70-D593) was used as the immunogen for the KCND1 antibody.

Storage

After reconstitution, the KCND1 antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
