Description

This antibody recognizes a carbohydrate epitope present on tumor-associated Lewis y antigen (Fucalpha1-2Galbeta1-4/3[Fucalpha1-3/4]GlcNAcbeta-). Lewis y is expressed in large bowel tumors and colorectal carcinomas. It may be useful in the classification of human renal and bladder tumors. The Lewis y antigen has been evaluated as a clinical marker for the diagnosis and prognosis of cholangiocarcinoma, hepatocellular carcinoma and breast cancer.

Application Notes

Optimal dilution of the Lewis y antibody should be determined by the researcher.

Immunogen

Live Ls174T cells (human colon carcinoma) were used as the immunogen for the Lewis y antibody.

Storage

Store the Lewis y antibody at 2-8oC (with azide) or aliquot and store at -20oC or colder (without azide).
