Description

LPS-induced TNF-alpha factor likely plays a role in regulating transcription of specific genes. May regulate through NFKB1 the expression of the CCL2/MCP-1 chemokine. May play a role in tumor necrosis factor alpha (TNF- alpha) gene expression.

Application Notes

Titration of the LITAF antibody may be required due to differences in protocols and substrate sensitivity.

Immunogen

A portion of amino acids 31-60 from the human protein was used as the immunogen for the LITAF antibody.

Storage

Aliquot the LITAF antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
