LRRC73 Antibody / Leucine-rich repeat-containing protein 73 (RQ8556)

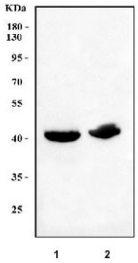

Catalog No.	Formulation	Size
RQ8556	0.5mg/ml if reconstituted with 0.2ml sterile DI water	100 ug

Bulk quote request

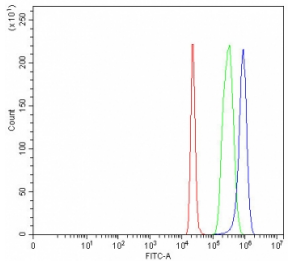

Availability	1-3 days
Species Reactivity	Human
Format	Antigen affinity purified
Host	Rabbit
Clonality	Polyclonal (rabbit origin)
Isotype	Rabbit IgG
Purity	Antigen affinity purified
Buffer	Lyophilized from 1X PBS with 2% Trehalose
UniProt	Q5JTD7
Applications	Western blot: 0.5-1ug/ml Immunofluorescence: 5ug/ml Flow cytometry: 1-3ug/million cells ELISA: 0.1-0.5ug/ml
Limitations	This LRRC73 antibody is available for research use only.

Immunofluorescent staining of FFPE human U-2 OS cells with LRRC73 antibody (red) and DAPI nuclear stain (blue). HIER: steam section in pH6 citrate buffer for 20 min.

Western blot testing of human 1) MCF7 and 2) HaCaT cell lysate with LRRC73 antibody. Predicted molecular weight ~33 kDa.

Flow cytometry testing of fixed and permeabilized human 293T cells with LRRC73 antibody at 1ug/million cells (blocked with goat sera); Red=cells alone, Green=isotype control, Blue= LRRC73 antibody.

Description

Making up nearly 6% of the human genome, chromosome 6 contains around 1,200 genes within 170 million base pairs of sequence. Deletion of a portion of the q arm of chromosome 6 is associated with early onset intestinal cancer suggesting the presence of a cancer susceptibility locus. Porphyria cutanea tarda is associated with chromosome 6 through the HFE gene which, when mutated, predisposes an individual to developing this porphyria. Notably, the PARK2 gene, which is associated with Parkinsons disease, and the genes encoding the major histocompatiblity complex proteins, which are key molecular components of the immune system and determine predisposition to rheumatic diseases, are also located on chromosome 6. Stickler syndrome, 21-hydroxylase deficiency and maple syrup urine disease are also associated with genes on chromosome 6. A bipolar disorder susceptibility locus has been identified on the q arm of chromosome 6. The LRRC73 gene product has been provisionally designated LRRC73 pending further characterization.

Application Notes

Optimal dilution of the LRRC73 antibody should be determined by the researcher.

Immunogen

An E.coli-derived human recombinant protein (amino acids M1-Q249) was used as the immunogen for the LRRC73 antibody.

Storage

After reconstitution, the LRRC73 antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
