## Description

Lyn is a protein tyrosine kinase which is important in cellular signaling. It contains an SH2 and SH3 domain and has been found to be cleaved after activation of caspases in apoptosis.

## Application Notes

Titration of the LYN antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

A portion of amino acids 32-62 from the human protein was used as the immunogen for this LYN antibody.

## Storage

Aliquot the LYN antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
