Mcm2 antibody western blot analysis in mouse Neuro-2a lysate.

## Description

Mcm2 acts as a factor that allows the DNA to undergo a single round of replication per cell cycle. Required for the entry in S phase and for cell division.

## Application Notes

Titration of the Mcm2 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

A portion of amino acids 713-742 from the mouse protein was used as the immunogen for this Mcm2 antibody.

## Storage

Aliquot the Mcm2 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
