Description

The protein kinase domain is predicted to be catalytically inactive. Molecular function: protein binding. There are two isoforms.

Application Notes

Titration of the MIK1 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 444-472 from the mouse protein was used as the immunogen for this MIK1 antibody.

Storage

Aliquot the MIK1 antibody and store frozen at -20°C or colder. Avoid repeated freeze-thaw cycles.
