### Description

Membrane progesterone receptor delta (mPRd), or progestin and adipoQ receptor 6 (PAQR6), is a protein that in humans is encoded by the PAQR6 gene. Predicted to enable signaling receptor activity. Predicted to be located in plasma membrane. Predicted to be integral component of membrane.

### Application Notes

Optimal dilution of the mPR delta antibody should be determined by the researcher.

## **Immunogen**

E. coli-derived recombinant human protein (amino acids M1-A292) was used as the immunogen for the mPR delta antibody.

## **Storage**

After reconstitution, the mPR delta antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
