MRC1L1 antibody western blot analysis in mouse lung tissue lysate

## Description

This gene encodes a type I membrane receptor protein highly related to the mannose receptor C type 1 protein (MRC1). The two genes are located near each other on chromosome 10 in a region thought to represent a segmental duplication.

## Application Notes

Titration of the MRC1L1 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

A portion of amino acids 359-388 from the human protein was used as the immunogen for this MRC1L1 antibody.

## Storage

Aliquot the MRC1L1 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
