## Description

Key regulator of protein phosphatase 1C (PPP1C). Mediates binding to myosin. As part of the PPP1C complex, involved in dephosphorylation of PLK1. Capable of inhibiting HIF1AN- dependent suppression of HIF1A activity. [UniProt]

## Application Notes

The stated application concentrations are suggested starting points. Titration of the Myosin Phosphatase antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

A portion of amino acids 481-514 from the human MYPT1 was used as the immunogen for the Myosin Phosphatase antibody.

## Storage

Aliquot the Myosin Phosphatase antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
