

NAPSA Antibody / Napsin A [clone MSVA-112R] (V6147)

Catalog No.	Formulation	Size
V6147-100UG	Antibody in 1X PBS with 0.05% BSA, 0.05% sodium azide	100 ug
V6147-20UG	Antibody in 1X PBS with 0.05% BSA, 0.05% sodium azide	20 ug

Recombinant **RABBIT MONOCLONAL**

[Bulk quote request](#)

Species Reactivity	Human
Format	Purified
Host	Rabbit
Clonality	Recombinant Rabbit Monoclonal
Isotype	Rabbit IgG, kappa
Clone Name	MSVA-112R
UniProt	O96009
Localization	Secreted
Applications	Immunohistochemistry (FFPE) : 1-2ug/ml
Limitations	This NAPSA/Napsin A antibody is available for research use only.

Napsin-A Rabbit Recombinant Monoclonal Antibody (MSVA-112R) tested on many normal and cancer tissues. The immunohistochemistry staining in these tissues aligns with the expression data in Human Protein Atlas.

Manual Protocol: Freshly cut sections should be used (less than 10 days between cutting and staining). Heat-induced antigen retrieval for 5 minutes in an autoclave at 121oC in pH 7.8 Target Retrieval Solution buffer. Apply the antibody at a dilution of 1:150 at 37oC for 60 minutes. Visualization of bound antibody by the EnVision Kit (Dako, Agilent) according to the manufacturer's directions.

Application Notes

1. Optimal dilution of the NAPSA/Napsin A antibody should be determined by the researcher.
2. This NAPSA/Napsin A antibody is recombinantly produced by expression in human HEK293 cells.

Immunogen

Recombinant human Napsin-A protein fragment (amino acids 189-299) (exact sequence is proprietary) was used as the immunogen for the NAPSA/Napsin A antibody.

Storage

NAPSA/Napsin A antibody with sodium azide - store at 2 to 8°C; antibody without sodium azide - store at -20 to -80°C.
