Description

Expression of NKX2.2 has been found in neuroendocrine tumors of the gut, making it a potential marker for the study of gastrointestinal neuroendocrine tumors. More recently, NKX2.2 protein was identified as a target of EWS-FLI-1, the fusion protein specific to Ewing sarcoma, and was shown to be differentially upregulated in Ewing sarcoma on the basis of array-based gene expression analysis. Antibody to NKX2.2 detects a valuable marker for Ewing sarcoma, with a sensitivity of 93% and a specificity of 89%, and aids in the differential diagnosis of small round cell tumors.

Application Notes

Titration of the NKX2.2 antibody may be required for optimal performance.

Immunogen

A human partial recombinant protein was used as the immunogen for this NKX2.2 antibody.

Storage

Store the NKX2.2 antibody at 2-8°C (with azide) or aliquot and store at -20°C or colder (without azide).
