Western blot analysis of NLRP3 antibody and MDA-MB231 lysate. Predicted molecular weight ~118kDa.

NLRP3 antibody immunohistochemistry analysis in formalin fixed and paraffin embedded human lymph tissue.

Description

NLRP3 is a pyrin-like protein containing a pyrin domain, a nucleotide-binding site (NBS) domain, and a leucine-rich repeat (LRR) motif. This protein interacts with the apoptosis-associated speck-like protein PYCARD/ASC, which contains a caspase recruitment domain, and is a member of the NALP3 inflammasome complex. This complex functions as an upstream activator of NF-kappaB signaling, and it plays a role in the regulation of inflammation, the immune response, and apoptosis.

Application Notes

Titration of the NLRP3 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 65-91 from the human protein was used as the immunogen for this NLRP3 antibody.

Storage

Aliquot the NLRP3 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
