NRAS Antibody (F50734)

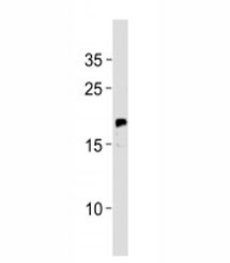

Catalog No.	Formulation	Size
F50734-0.4ML	In 1X PBS, pH 7.4, with 0.09% sodium azide	0.4 ml
F50734-0.08ML	In 1X PBS, pH 7.4, with 0.09% sodium azide	0.08 ml

Bulk quote request

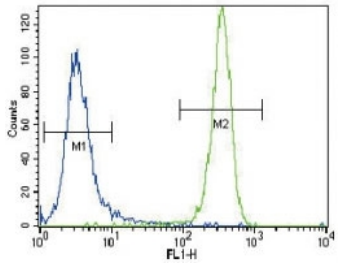

Availability	1-3 business days
Species Reactivity	Human
Predicted Reactivity	Pig
Format	Purified
Host	Rabbit
Clonality	Polyclonal (rabbit origin)
Isotype	Rabbit Ig
Purity	Purified
UniProt	P01111
Applications	Western blot: 1:1000 IHC (Paraffin): 1:10-1:50 Flow Cytometry: 1:10-1:50
Limitations	This NRAS antibody is available for research use only.

IHC analysis of FFPE human lung carcinoma tissue stained with NRAS antibody

NRAS antibody western blot analysis in MCF-7 lysate. Predicted molecular weight ~21 kDa.

NRAS antibody flow cytometric analysis of NCI-H460 cells (green) compared to a negative control (blue). FITC-conjugated goat-anti-rabbit secondary Ab was used for the analysis.

Description

NRAS is a membrane protein that shuttles between the Golgi apparatus and the plasma membrane. This shuttling is regulated through palmitoylation and depalmitoylation by the ZDHHC9-GOLGA7 complex. This protein, which has intrinsic GTPase activity, is activated to a GTP-bound form by a GTPase activating protein and inactivated to a GDP-bound form by a guanine nucleotide-exchange factor. Defects in the gene encoding this protein are a cause of juvenile myelomonocytic leukemia (JMML).

Application Notes

Titration of the NRAS antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 147-179 from the human protein was used as the immunogen for this NRAS antibody.

Storage

Aliquot the NRAS antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
