NRF1 Antibody [clone 2G4] (RQ5524)

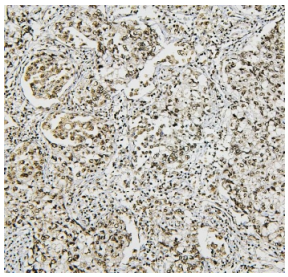

Catalog No.	Formulation	Size
RQ5524	0.5mg/ml if reconstituted with 0.2ml sterile DI water	100 ug

Bulk quote request

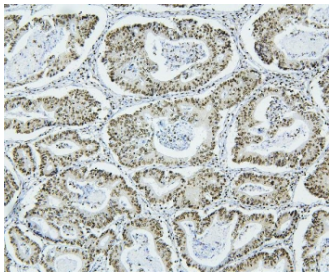

Availability	1-3 business days
Species Reactivity	Human
Format	Antigen affinity purified
Host	Mouse
Clonality	Monoclonal (mouse origin)
Isotype	Mouse IgG2a
Clone Name	2G4
Purity	Affinity purified
Buffer	Lyophilized from 1X PBS with 2% Trehalose and 0.025% sodium azide
UniProt	Q16656
Localization	Nuclear
Applications	Western blot: 0.5-1ug/ml Immunohistochemistry (FFPE): 1-2ug/ml Flow cytometry: 1-3ug/million cells Immunofluorescence: 2-4ug/ml
Limitations	This NRF1 antibody is available for research use only.

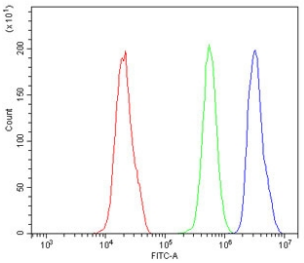

IHC staining of FFPE human testis cancer with NRF1 antibody. HIER: boil tissue sections in pH6, 10mM citrate buffer, for 20 min and allow to cool before testing.

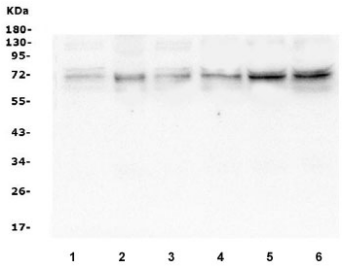

IHC staining of FFPE human lung cancer with NRF1 antibody. HIER: boil tissue sections in pH6, 10mM citrate buffer, for 20 min and allow to cool before testing.

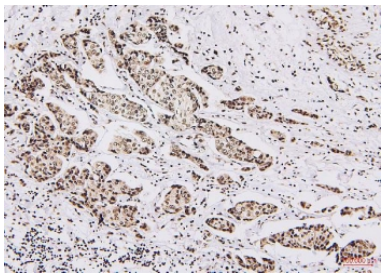

IHC staining of FFPE human rectal cancer with NRF1 antibody. HIER: boil tissue sections in pH6, 10mM citrate buffer, for 20 min and allow to cool before testing.

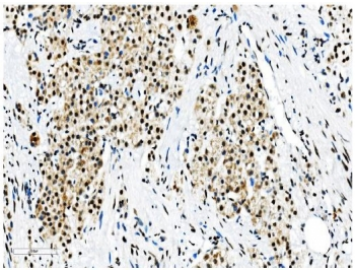

Flow cytometry testing of human PC-3 cells with NRF1 antibody at 1ug/million cells (blocked with goat sera); Red=cells alone, Green=isotype control, Blue= NRF1 antibody.

Western blot testing of human 1) K562, 2) HL60, 3) U-2 OS, 4) Raji, 5) Caco-2 and 6) HepG2 cell lysate with NRF1 antibody. Expected molecular weight: isoforms from 45-67 kDa.

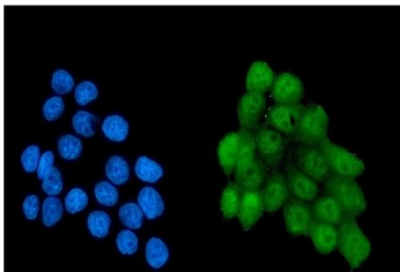

IHC staining of FFPE human breast cancer with NRF1 antibody. HIER: boil tissue sections in pH6, 10mM citrate buffer, for 20 min and allow to cool before testing.

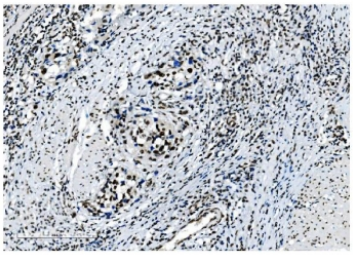

IHC staining of FFPE human renal carcinoma with NRF1 antibody. HIER: boil tissue sections in pH8 EDTA for 20 min and allow to cool before testing.

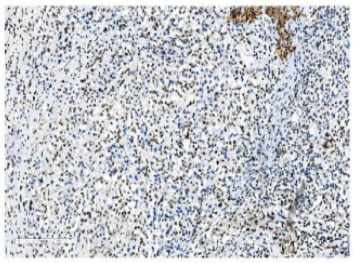

IHC staining of FFPE human skin cancer with NRF1 antibody. HIER: boil tissue sections in pH8 EDTA for 20 min and allow to cool before testing.

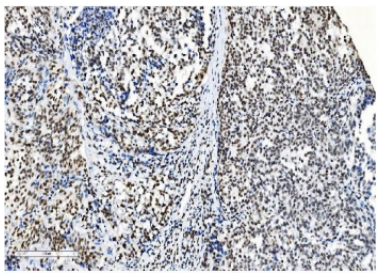

Immunofluorescent staining of human MCF7 cells with NRF1 antibody (green) DAPI nuclear stain (blue). HIER: boil tissue sections in pH6, 10mM citrate buffer, for 20 min and allow to cool before testing.

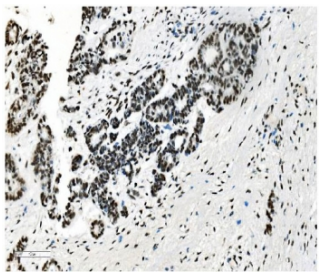

IHC staining of FFPE human bladder cancer with NRF1 antibody. HIER: boil tissue sections in pH8 EDTA for 20 min and allow to cool before testing.

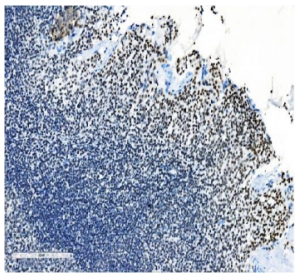

IHC staining of FFPE human gastric cancer with NRF1 antibody. HIER: boil tissue sections in pH8 EDTA for 20 min and allow to cool before testing.

IHC staining of FFPE human melanoma with NRF1 antibody. HIER: boil tissue sections in pH8 EDTA for 20 min and allow to cool before testing.

IHC staining of FFPE human ovarian cancer with NRF1 antibody. HIER: boil tissue sections in pH8 EDTA for 20 min and allow to cool before testing.

IHC staining of FFPE human tonsil with NRF1 antibody. HIER: boil tissue sections in pH8 EDTA for 20 min and allow to cool before testing.

Description

Nuclear respiratory factor 1, is also known as NRF1. This gene encodes a protein that homodimerizes and functions as a transcription factor which activates the expression of some key metabolic genes regulating cellular growth and nuclear genes required for respiration, heme biosynthesis, and mitochondrial DNA transcription and replication. The protein has also been associated with the regulation of neurite outgrowth. Alternative splicing results in multiple transcript variants. Confusion has occurred in bibliographic databases due to the shared symbol of NRF1 for this gene and for nuclear factor (erythroid-derived 2)-like 1 which has an official symbol of NFE2L1.

Application Notes

Optimal dilution of the NRF1 antibody should be determined by the researcher.

Immunogen

A human recombinant protein (amino acids D246-Q503) was used as the immunogen for the NRF1 antibody.

Storage

After reconstitution, the NRF1 antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
