

## Nucleophosmin Antibody [clone 1042CT5.2.1] (F52273)

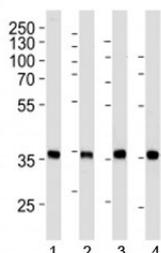

Catalog No.	Formulation	Size
F52273-0.4ML	In 1X PBS, pH 7.4, with 0.09% sodium azide	0.4 ml
F52273-0.08ML	In 1X PBS, pH 7.4, with 0.09% sodium azide	0.08 ml

<b>Availability</b>	1-3 business days
<b>Species Reactivity</b>	Human
<b>Format</b>	Purified
<b>Host</b>	Mouse
<b>Clonality</b>	Monoclonal (mouse origin)
<b>Isotype</b>	Mouse IgG1
<b>Clone Name</b>	1042CT5.2.1
<b>Purity</b>	Purified
<b>UniProt</b>	P06748
<b>Applications</b>	IHC (Paraffin) : 1:25 Western Blot : 1:1000
<b>Limitations</b>	This Nucleophosmin antibody is available for research use only.

Immunohistochemical analysis of paraffin-embedded human thymus using Nucleophosmin antibody at 1:25 dilution.

Nucleophosmin antibody western blot analysis in 1) HeLa, 2) Jurkat, 3) MCF-7, and 4) mouse NIH3T3 lysate. Expected/observed molecular weight: ~38kDa.

## Description

Nucleophosmin is involved in diverse cellular processes such as ribosome biogenesis, centrosome duplication, protein chaperoning, histone assembly, cell proliferation, and regulation of tumor suppressors p53/TP53 and ARF. Binds ribosome presumably to drive ribosome nuclear export. Associated with nucleolar ribonucleoprotein structures and bind single-stranded nucleic acids. Acts as a chaperonin for the core histones H3, H2B and H4. Stimulates APEX1 endonuclease activity on apurinic/apyrimidinic (AP) double-stranded DNA but inhibits APEX1 endonuclease activity on AP single-stranded RNA. May exert a control of APEX1 endonuclease activity within nucleoli devoted to repair AP on rDNA and the removal of oxidized rRNA molecules. In concert with BRCA2, regulates centrosome duplication. Regulates centriole duplication: phosphorylation by PLK2 is able to trigger centriole replication.

## Application Notes

Titration of the Nucleophosmin antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

Purified His-tagged protein was used to produced this monoclonal Nucleophosmin antibody.

## Storage

Aliquot the Nucleophosmin antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
