### Description

NUPL2 is required for the export of mRNAs containing poly(A) tails from the nucleus into the cytoplasm. In case of infection by HIV-1, it may participate in the docking of viral Vpr at the nuclear envelope.

### Application Notes

Optimal dilution of the NUP42 antibody should be determined by the researcher.

## **Immunogen**

An E.coli-derived human recombinant protein (Q52-V423) was used as the immunogen for the NUP42 antibody.

## **Storage**

After reconstitution, the NUP42 antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
