Description

The protein encoded by this gene binds to CLP1 to form pre-mRNA cleavage factor IIm. The encoded protein is necessary for efficient Pol II transcription termination and may be involved in degradation of the 3' product of polyA site cleavage.

Application Notes

Optimal dilution of the PCF11 antibody should be determined by the researcher.

Immunogen

An E.coli-derived human recombinant protein (amino acids N1214-V1555) was used as the immunogen for the PCF11 antibody.

Storage

After reconstitution, the PCF11 antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
