Western blot analysis of PCTAIRE1 antibody and HepG2 lysate

Western blot analysis of PCTAIRE1 antibody and 293 cell lysate (2 ug/lane) either nontransfected (Lane 1) or transiently transfected with the PCKT1 gene (2).

Description

The protein encoded by this gene belongs to the cdc2/cdkx subfamily of the ser/thr family of protein kinases. It may play a role in signal transduction cascades in terminally differentiated cells. This gene is thought to escape X inactivation. Two transcript variants encoding the same protein have been found for this gene.

Application Notes

Titration of the PCTAIRE1 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 357-386 from the human protein was used as the immunogen for this PCTAIRE1 antibody.

Storage

Aliquot the PCTAIRE1 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
