### Description

Phosphofructokinase platelet protein catalyzes the phosphorylation of D-fructose 6-phosphate to fructose 1,6-bisphosphate by ATP, the first committing step of glycolysis.

### Application Notes

Titration of the PFKP antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## **Immunogen**

A partial recombinant protein corresponding to amino acids 40-300 from the human protein was used as the immunogen for the PFKP antibody.

## **Storage**

Aliquot the PFKP antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
