### Description

PHD finger protein 6 is a transcriptional regulator that associates with ribosomal RNA promoters and suppresses ribosomal RNA (rRNA) transcription.

### Application Notes

Titration of the PHF6 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## **Immunogen**

A portion of amino acids 148-180 from the human protein was used as the immunogen for the PHF6 antibody.

## **Storage**

Aliquot the PHF6 antibody and store frozen at -20°C or colder. Avoid repeated freeze-thaw cycles.
