Description

EGFR is a receptor tyrosine kinase. Receptor for epidermal growth factor (EGF) and related growth factors including TGF- α , amphiregulin, betacellulin, heparin-binding EGF-like growth factor, GP30 and vaccinia virus growth factor. Is involved in the control of cell growth and differentiation.

Application Notes

Optimal dilution of the phospho-EGFR antibody should be determined by the researcher.

Immunogen

A synthetic peptide specific to human EGFR (surrounding pY1068) was used as the immunogen for the phospho-EGFR antibody.

Storage

Store the phospho-EGFR antibody at -20oC.
