Phospho-HSF1 Antibody (pS326) [clone BHI-8] (RQ8863)

Catalog No.	Formulation	Size
RQ8863	Antibody in PBS with 0.02% sodium azide, 50% glycerol and 0.4-0.5mg/ml BSA	100 ul

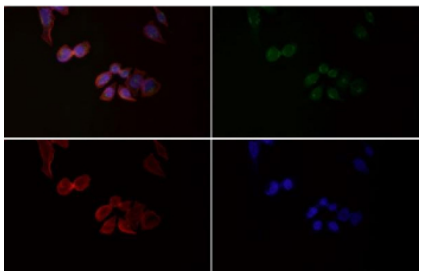

Recombinant RABBIT MONOCLONAL

Bulk quote request

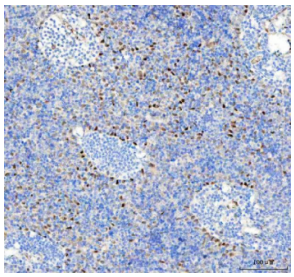

Availability	1-2 days
Species Reactivity	Human
Format	Purified
Host	Rabbit
Clonality	Recombinant Rabbit Monoclonal
Isotype	Rabbit IgG
Clone Name	BHI-8
Applications	1:500-1:20001:50-1:2001:50-1:200
Limitations	This Phospho-HSF1 antibody (pS326) is available for research use only.

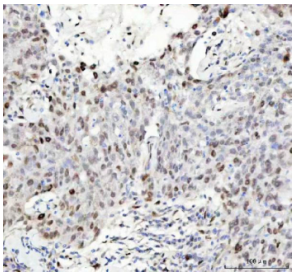

Immunofluorescent staining of FFPE human HeLa cells with Phospho-HSF1 antibody (green), Phalloidin (red) and DAPI nuclear stain (blue). HIER: steam section in pH6 citrate buffer for 20 min.

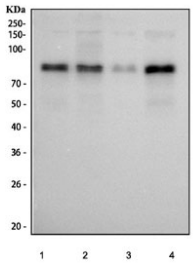

Immunofluorescent staining of FFPE human HeLa cells with Phospho-HSF1 antibody (green), Phalloidin (red) and DAPI nuclear stain (blue). HIER: steam section in pH6 citrate buffer for 20 min.

IHC staining of FFPE human spleen tissue with Phospho-HSF1 antibody. HIER: boil tissue sections in pH8 EDTA for 20 min and allow to cool before testing.

IHC staining of FFPE human breast cancer tissue with Phospho-HSF1 antibody. HIER: boil tissue sections in pH8 EDTA for 20 min and allow to cool before testing.

Western blot testing of human 1) HeLa, 2) K562, 3) HepG2 and 4) MCF7 cell lysate with Phospho-HSF1 antibody.

Description

Phosphorylation of Heat shock factor protein 1 can either activate or inhibit its activity, depending on the specific sites that are modified. This intricate regulatory mechanism allows cells to fine-tune their response to stress and optimize their survival. Studies have shown that phosphorylation of HSF1 at certain sites can enhance its ability to bind to DNA and activate the expression of heat shock proteins. On the other hand, phosphorylation at other sites can inhibit HSF1 activity and promote its degradation. This delicate balance between activation and inhibition is critical for maintaining cellular homeostasis under stress conditions.

Application Notes

Optimal dilution of the Phospho-HSF1 antibody (pS326) should be determined by the researcher.

Immunogen

A synthetic peptide specific to the region of human HSF1 protein surrounding phosphorylated serine 326 protein was used as the immunogen for the Phospho-HSF1 antibody (pS326).

Storage

Store the Phospho-HSF1 antibody at -20oC.
