

## Placental Alkaline Phosphatase Antibody (F44307)

Catalog No.	Formulation	Size
F44307-0.4ML	In 1X PBS, pH 7.4, with 0.09% sodium azide	0.4 ml
F44307-0.08ML	In 1X PBS, pH 7.4, with 0.09% sodium azide	0.08 ml

[Bulk quote request](#)

<b>Availability</b>	1-3 business days
<b>Species Reactivity</b>	Human
<b>Format</b>	Antigen affinity purified
<b>Host</b>	Rabbit
<b>Clonality</b>	Polyclonal (rabbit origin)
<b>Isotype</b>	Rabbit Ig
<b>Purity</b>	Antigen affinity
<b>UniProt</b>	P05187
<b>Applications</b>	Western Blot : 1:1000 IHC (Paraffin) : 1:10-1:50
<b>Limitations</b>	This placental Alkaline Phosphatase antibody is available for research use only.

Placental Alkaline Phosphatase antibody immunohistochemistry analysis in formalin fixed and paraffin embedded human placenta tissue.

## Description

There are at least four distinct but related alkaline phosphatases: intestinal, placental, placental-like, and liver/bone/kidney (tissue non-specific). The first three are located together on chromosome 2 while the tissue non-specific form is located on chromosome 1. The product of this gene is a membrane bound glycosylated enzyme, also referred to as the heat stable form, that is expressed primarily in the placenta although it is closely related to the intestinal form of the enzyme as well as to the placental-like form. The coding sequence for this form of alkaline phosphatase is unique in that the 3' untranslated region contains multiple copies of an Alu family repeat. In addition, this gene is polymorphic and three common alleles (type 1, type 2 and type 3) for this form of alkaline phosphatase have been well characterized.

For a clone-defined placental marker antibody with extensive placenta-positive and normal tissue-negative immunohistochemistry validation data, see our [ALPP Antibody / Placental Marker Antibody](#) page featuring clone rALP/870.

## Application Notes

Titration of the placental Alkaline Phosphatase antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

A portion of amino acids 56-83 from the human protein was used as the immunogen for this placental Alkaline Phosphatase antibody.

## Storage

Aliquot the placental Alkaline Phosphatase antibody and store frozen at -20°C or colder. Avoid repeated freeze-thaw cycles.
