Description

Proline rich 9 is a protein that in humans is encoded by the PRR9 gene. PRR9 is pseudo-response regulator. It involved in clock function. PRR7 and PRR9 are partially redundant essential components of a temperature-sensitive circadian system.

Application Notes

Optimal dilution of the PRR9 antibody should be determined by the researcher.

Immunogen

Amino acids CQHPCQDKCLVQAQEVCLSQCQE were used as the immunogen for the PRR9 antibody.

Storage

After reconstitution, the PRR9 antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
