Description

Predicted to enable GTPase activator activity and protein heterodimerization activity. Predicted to be involved in activation of GTPase activity. Predicted to act upstream of or within Ral protein signal transduction; regulation of exocyst localization; and regulation of protein localization. Located in cytosol and plasma membrane.

Application Notes

Optimal dilution of the RALGAPA2 antibody should be determined by the researcher.

Immunogen

E. coli-derived recombinant human protein (amino acids R246-Q1556) was used as the immunogen for the RALGAPA2 antibody.

Storage

After reconstitution, the RALGAPA2 antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
