

Recombinant ALK Antibody / Anaplastic Lymphoma Kinase [clone ALK1/2766R] (V7410)

Catalog No.	Formulation	Size
V7410-100UG	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide	100 ug
V7410-20UG	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide	20 ug
V7410SAF-100UG	1 mg/ml in 1X PBS; BSA free, sodium azide free	100 ug
V7410IHC-7ML	Prediluted in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide; *For IHC use only*	7 ml

Recombinant **RABBIT MONOCLONAL**

[Bulk quote request](#)

Availability	1-3 business days
Species Reactivity	Human
Format	Purified
Host	Rabbit
Clonality	Recombinant Rabbit Monoclonal
Isotype	Rabbit IgG, kappa
Clone Name	ALK1/2766R
Purity	Protein A affinity
UniProt	Q9UM73
Localization	Cytoplasmic, nuclear
Applications	Immunohistochemistry (FFPE) : 0.5-1ug/ml for 30 min at RT
Limitations	This recombinant ALK antibody is available for research use only.

IHC testing of FFPE anaplastic large-cell lymphoma with recombinant ALK antibody (clone ALK1/2766R). HIER: boil tissue sections in 10mM Tris buffer with 1mM EDTA, pH 9, for 10-20 min followed by cooling at RT for 20 min.

SDS-PAGE analysis of purified, BSA-free recombinant ALK antibody (clone ALK1/2766R) as confirmation of integrity and purity.

Description

The wild-type anaplastic lymphoma kinase (ALK) protein is a 200kDa transmembrane receptor tyrosine kinase. Its expression is restricted to a few scattered cells in the nervous system (some glial cells and neurons, and a few endothelial cells and pericytes). The hybrid gene, $\tilde{\Delta}$ NPM-ALK, created by the t(2;5)(p23;q35) chromosomal translocation encodes part of the nucleolar phosphoprotein, nucleophosmin (NPM), joined to the entire cytoplasmic portion of the anaplastic lymphoma kinase (ALK) receptor tyrosine kinase. As a consequence, the ALK gene comes under the control of the NPM promoter, which induces a permanent and ubiquitous transcription of the NPM-ALK hybrid gene, resulting in the production of a 80kDa NPM-ALK chimeric protein. This translocation is found in anaplastic large cell lymphomas (ALCL). Reportedly, expression of ALK indicates a better prognosis. Approximately 5%-10% of non-small cell lung carcinomas also express ALK protein producing a cytoplasmic staining pattern. This MAb also reacts with blood vessels that serves as an internal positive control.

Application Notes

The stated application concentrations are suggested starting amounts. Titration of the recombinant ALK antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

Recombinant full length human protein was used as the immunogen for this recombinant ALK antibody.

Storage

Store the recombinant recombinant ALK antibody at 2-8oC (with azide) or aliquot and store at -20oC or colder (without azide).
