Western blot testing of human K562 cell lysate with recombinant BRAF antibody at 1:100 dilution. Predicted molecular weight ~84 kDa.

IHC testing of formalin fixed and paraffin embedded human kidney tissue with recombinant BRAF antibody at 1:500 dilution. HIER: steam section in pH6 citrate buffer for 20 min and allow to cool prior to staining.

Description

This antibody reacts to human serine/threonine-protein kinase B-raf (BRAF). It may also react to mouse B-raf, as predicted by immunogen homology.

Application Notes

The stated application concentrations are suggested starting points. Titration of the recombinant BRAF antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A peptide corresponding to the residues near N-terminus of human B-raf was used as the immunogen for the recombinant BRAF antibody.

Storage

Store the recombinant BRAF antibody at -20oC.
