## Description

CD40 is a receptor on antigen-presenting cells of the immune system and is essential for mediating a broad variety of immune and inflammatory responses including T cell-dependent immunoglobulin class switching, memory B cell development, and germinal center formation.

## Application Notes

Optimal dilution of the recombinant CD40 antibody should be determined by the researcher.

## Immunogen

A portion of amino acids 29-107 was used as the immunogen for the recombinant CD40 antibody.

## Storage

Aliquot the recombinant CD40 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
