## **Description**

Alpha-catenin and beta-catenin bind to the intracellular domain of E-cadherin while p120 catenin (delta-1-catenin) binds E-cadherin at a juxta-membrane site. The complex stabilizes tight junctions. In the cell, delta-1-catenin localized to the E-cadherin/catenins cell adhesion complex, directly associates with cytoplasmic C-terminus of E-cadherin and may similarly interact with other cadherins.

### **Application Notes**

Optimal dilution of the recombinant Delta 1 Catenin antibody should be determined by the researcher.

#### **Immunogen**

A portion of amino acids 900-1,000 was used as the immunogen for the recombinant Delta 1 Catenin antibody.

#### **Storage**

Aliquot the recombinant Delta 1 Catenin antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
