## Description

Recognizes a protein of 94kDa, which is identified as the glucose-regulated protein 94 (grp94) and also tumor rejection antigen (gp96). Grp94 shows a high degree of sequence homology with the heat shock protein 90 (hsp90). This MAb is highly specific to grp94 and shows minimal cross-reaction with other members of the HSP90 family. Grp's are a class of proteins unresponsive to heat shock and are induced by glucose deprivation. Grp94 has been briefly studied as a prognostic factor in breast cancer.

## Application Notes

Optimal dilution of the recombinant GRP94 antibody should be determined by the researcher.

## Immunogen

A recombinant full-length human protein was used as the immunogen for this recombinant GRP94 antibody.

## Storage

Store the recombinant GRP94 antibody at 2-8°C (with azide) or aliquot and store at -20°C or colder (without azide).
