Description

C-erbB-2/HER-2 is a member of the EGFR family. Receptors of this family are located on the plasma membrane and consist of an extracellular ligand-binding domain that is connected to a large intracellular domain by a single transmembrane sequence. c-erbB-2/HER-2 protein is over-expressed in a variety of carcinomas especially those of breast and ovary.

Application Notes

Optimal dilution of the recombinant HER-2 antibody should be determined by the researcher.

Immunogen

A recombinant fragment (within amino acids 1155-1255) of human HER-2/ERBB2 protein was used as the immunogen for the recombinant HER-2 antibody.

Storage

Aliquot the recombinant HER-2 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
