## Description

Recognizes a 60kDa protein, identified as the heat shock protein 60 (hsp60). A wide variety of environmental and pathophysiological stressful conditions trigger the synthesis of a family of proteins known as heat shock proteins (hsp s), more appropriately called as stress response proteins (srp s). hsp60 is a potential antigen in a number of autoimmune diseases. In human arthritis and in experimentally induced arthritis in animals, disease development coincides with the development of immune reactivity directed against not only bacterial hsp60, but also against its mammalian homolog.

For a recombinant, Protein Microarray Validated option with broad mammalian species validation, see our HSP60 Antibody / Heat Shock Protein 60 Antibody page.

## Application Notes

Optimal dilution of the recombinant HSP60 antibody should be determined by the researcher.

## Immunogen

Recombinant full-length human HSPD1 protein was used as the immunogen for the recombinant HSP60 antibody.

## Storage

Aliquot the recombinant HSP60 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
